Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

None of the prior art made of record teaches or suggests a graphic process for substantially simultaneously displaying on a computer display device variations in a plurality of communication network functions and comprising the steps of:

- (a) providing access to a plurality of communication network functions, each network function having a data value within a range of data values;
- (b) dividing a display area into a plurality of display divisions;
- (c) assigning each display division to a respective network function;
- (d) scaling a variable graphic quality of each display division to the range of data values of the network function associated with the display division;
- (e) without user interaction, periodically accessing each of the networking functions to retrieve a respective current data value;
- (f) displaying for each display division a respective variation of the graphic quality which corresponds to the current data value of the network function associated with the display division; and
- (g) scaling a size of a display division to the range of data values.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

-Thomson (5,682,487) a method for providing views of multiple network devices in a network management application, wherein different network devices have different display window sizes. See Fig.7 and column 8, lines 63-68.

-Selles (6,271,844) discloses (Fig. 2) a display screen is divided into six display divisions, and each division displays a different networking function.

-Ennis, Jr. et al (5,867,483) disclose (Figs. 11-16) a schematic illustration of an exemplary console graphical user screen displaying the access channel bandwidth utilization based on the length of time.
